U.S. Patent and Trademark Office PTOL-303 (Rev. 04-01) Continuation of 5. does NOT place the application in condition for allowance because: Winston teaches line 311 as being a single line which clearly disclosed in figure 3. Column 4 lines 55-60 clearly cited "Each slot connector in the computer system 100 is connected to the module detection unit 310 via corresponding module detection connection. Line 311 in FIG. 3 illustrates a plurality of module detection connections that connects the module detection unit 310 to a plurality of slot connectors.". For record, in the previous response, Applicant made no acknowledgment or admission that in one embodiment Winston teachs line 311 as being a single line signal. For purposes of Appeal, claims 1-8 and 10-20 are rejected under 102(e) to Winston.
